KUNAL MEHTA

errmehtakunal@outlook.com | +91-7622834463 | www.linkedin.com/in/kunlmehta | Leetcode Profile

Profile Summary

Highly Motivated and detail-oriented software developer with 4 years of experience in building and maintaining scalable applications using technologies including but not limited to Python 3.8+, Django, C#.NET, SQL, JavaScript, HTML5. Building a strong foundation with data structures and algorithms (DSA), system design and clean coding practices.

Skills

Languages: Python | SQL | C# | JavaScript | HTML5 | C++

Frameworks: Django | .NET Core | ASP.NET | Django Rest Framework | Entity | Flask

Technologies/Miscellaneous: DSA (Data Structures and Algorithms) | System Design | REST APIs | jQuery | ORM Tools | Celery | Pandas | Web scraping | Machine Learning | Design patterns | CSS3 | Git | APIs

Tools and IDEs: PyCharm | PostgreSQL | Postman | GitHub | MS SQL Server | Visual Studio | SQL Profiler | AWS | GCP

Work Experience

LTIMindtree Limited | Software Engineer ***June 2022 – Present***

➢ **ELogistics Application**

- Worked as a **Software Engineer** for the **development** and **maintenance** of logistics and supply chain management web applications in the **manufacturing domain**. The application ensures seamless coordination across multiple teams involved in the process.
- **Contributed** to **development** of frontend and backend components using .NET and Python technologies in an Agile environment. Written clean and efficient code throughout the entire project life cycle - including **unit testing**, user acceptance testing **(UAT)** and **resolution** of production issues.
- Contributed to **implement** key functionalities such as **authentication** and **Single Sign-On (SSO)** to enhance application **reliability, user experience** and **security**.
- **Optimized** some modules using **query optimization** techniques, reducing the **time taken** for execution by **60%**.
- **Automated** regression process which saved the time by **80%** and **reduced** a significant amount of manual work.

Lemon Technologies Pvt Ltd | Junior Python Developer ***June 2021 – May 2022***

➢ **Bot Store web app**

- As a **Python** developer, **developed, deployed** and **maintained** a web-based product with multiple modules for **100+ clients**.
- Application contains various bots(modules) to **automate** and **standardize** finance, accounting and auditing workflows which were previously executed manually by clients—resulting in a **45% reduction** in time taken to complete the workflow.
- **Automated** various processes by using technologies and concepts like **data processing**, Integration of **APIs**, **authentication** and **report generation**.

➢ **Careers page**

- **Piloted** the **development** and **deployment** of an internal **Application management** system to streamline tracking of job applications across the organization, which **reduced** workload for HRs increasing their **work efficiency** by **30%**.

➢ **Internal RPA bots**

- **Automated** multiple internal auditing and accounting processes by **developing** a suite of bots leveraging **web scraping, data cleaning, machine learning** and Robotic Process Automation **(RPA).** This initiative resulted in a **50% reduction** in processing time, increasing productivity across other teams who did the work manually before.

Projects

Virtual Fashion Assistant (FYP)

- Worked in a team to develop an app using **the Flask framework** in **Python** and used **Machine Learning** to train models.
- Used **Convolutional Neural Networks (CNNs)** to identify color and used it to train a model leveraging clothing specific dataset to **identify** type of clothing. Used the same model to give recommendations from another dataset - depending on the type of clothing in image uploaded by user. Used **Firebase** to host app.
- Tools, technologies and languages used: **Python, Flask, Machine learning (CNN), Firebase, TensorFlow, OpenCV**

Education

Gujarat Technological University (SCET, Surat) ***2017 - 2021***

- *Computer engineering | CGPA: **8.28***

Citizen's School, Surat, Gujarat ***2015 - 2017***

- *GSHSEB Science (Class XI, XII), Percentage: **82.1%***

Citizen's School, Surat, Gujarat ***2014 - 2015***

- *GSHSEB SSC (Class X), Percentage: **86.8%***

Academic and Extracurricular Achievements

- Received an award “Super Crew” by LTIMindtree - For reliability and high-quality contribution
- Received an award “Problem Solver” twice by LTIMindtree - For resolution of long pending issues and amazing requirement delivery.
- Solved 100+ DSA problems across many platforms.
