

Parth Chauhan

 [@parthchauhan](#) |  +91 9429323131 |  parthdchauhan106@gmail.com |  [@parthchauhan](#)

Summary

Aspiring Computer Engineering student with foundational experience in computer engineering, focusing on programming and machine learning and Full Stack Development. Eager to contribute to impactful software solutions and continuous growth in dynamic environments.

Skills

- **Programming Languages:** C | Python | HTML | CSS | JavaScript (NodeJS, ReactJS, NextJS, ExpressJS)
- **Tools & Technologies:** Git | Azure Cloud Experience | SQL | MongoDB
- **Soft Skills:** Problem Solving | Project Management | Creativity | Attention to Detail
- **AI assistance for Research, Documentation, Debugging and Optimization:** Claude, ChatGPT, Gemini
- **Languages:** English, Hindi, Gujarati

Education

Bachelor of Technology in Computer Engineering

Sarvajanik College Of Engineering & Technology, Surat [Sarvajanik University]

2021 - July,2025 CGPA - 9

- **Relevant Coursework:** Computer Network | Data Structure and Algorithms | Object- Oriented Programming | Database Management Systems | Computer Networks | Data Mining | Artificial Intelligence | Machine Learning | Big Data Analytics

Projects

Project title: KrishiLink – Farmer’s Portal

[[Link](#)] FEB-2025

Role: Full-Stack Developer

- Developed a web-based platform to connect farmers and businesses for transparent and efficient crop trading. Used ReactJS for frontend development and Node.js with MongoDB for backend and data storage.
- Successfully deployed multiple modules with focus on usability, security, and performance.

Project title: Smart Traffic Signal

[[Link](#)] OCT-2024

Role: Full-Stack Developer & AI Integrator

- Utilized AI algorithms, including **R-CNN** and **YOLOv5**, for real-time traffic, optimizing signal timings dynamically. **MERN Stack** and **Flask** technologies were used to integrate the AI models, ensuring smooth communication between the system components. This resulted in improved traffic flow, reduced congestion, and enhanced safety at intersections.
- The successfully optimized traffic flow, reducing congestion by 30% during peak hours.

Project Title: AI Talent Intelligence Platform

[[Link](#)] JUN-2026

Role: Full-Stack Developer & AI Integrator

Tech Stack: React 19 (Next.js 15), TypeScript, Django REST Framework, PostgreSQL, OpenAI/LangChain, Tailwind CSS

- **AI-Powered Resume Parsing:** Engineered a robust ingestion pipeline using LangChain and OpenAI/Groq to extract structured skills, certifications, and experience from unstructured PDF resumes with high accuracy.
- **Predictive Talent Analytics:** Implemented ML-based suitability scoring using scikit-learn and TensorFlow to match interns to job roles based on skill embeddings and performance metrics.
- **Next.js Migration & Performance:** Led migration of frontend from Vite to Next.js 15, implementing SSR and reducing initial page load times through advanced caching strategies.

- Role-Based Access Control (RBAC): Architected a secure JWT authentication system managing granular permissions across three user roles (Admin, Manager, Intern); automated manager review time by an estimated 60%.
- Deployed a premium “Mission Control” glassmorphic design system standardizing typography and transitions across 20+ responsive pages; optimized PostgreSQL queries to maintain performance at scale.

Project Title: Aesthetix Blog – Full-Stack Content Management Platform

[[Link](#)] MAR-2026

Tech Stack: Next.js 16 (App Router), React 19, TypeScript, Tailwind CSS 4, Sanity.io (Headless CMS), Supabase (Auth & PostgreSQL), Vercel

- Architecture & CMS: Integrated Sanity.io as a headless CMS enabling real-time content updates and decoupled frontend/backend management via a custom-configured Sanity Studio.
- Authentication & Security: Implemented Supabase for role-based authentication and secure PostgreSQL database management, with a high-fidelity Tailwind CSS 4 glassmorphic design system.
- Performance Engineering: Leveraged React 19 concurrent features, Next.js Server Components, SSG, and WebP image optimization for near-instant page loads and top-tier Lighthouse scores.
- Automated CI/CD: Orchestrated a zero-downtime deployment pipeline via Vercel with Sanity content hooks, enabling non-technical authors to manage posts, categories, and profiles without code changes.

Professional Experience / Training

AI/ML Engineer Intern

Cyber Security Umbrella (CSU)

(JAN2026-PRESENT)| Gujarat, India

- Developed **SOC Central**, a Security Operations Center management platform aggregating logs from Wazuh (SIEM), G Suite, MDM, EDR, Meraki, and SonicWall; integrated ML-based anomaly detection (Isolation Forest) and a Google Gemini AI Assistant for threat querying and automated executive SOC report generation.
- Built **EcoLens Insights**, an ESG analytics platform with AI-driven document analysis (PDF/Word), automated carbon footprint and BRSR/SBTi compliance calculations, interactive Recharts dashboards, and PDF report generation; built on React, Django, and Supabase/PostgreSQL.
- Architected RBAC with MFA and company-specific tool permissions across both platforms; tech stack: React, Vite, TypeScript, Tailwind CSS, shadcn/ui, Django, and PostgreSQL.

Code Unnati Intern

SAP & Edunet Foundation

(JAN-2025-JUN-2025) | Gujarat, India

- Completed a hands-on internship Focused on **Machine Learning, Cyber Security in IoT, SAP Analytics Cloud**.
- Developed a mini-project – Farmers Product Portal using **MERN Stack**, solving the problem statement of improving **market access** for farmers and facilitates **real-time decision-making** for buyers.

Applied Cloud Computing Trainee

Microsoft & Edunet Foundation

(JUN-2024) | Gujarat, India

- Completed a three weeks industrial training on "Applied Cloud Computing for Software Development".
- Gained hands-on exposure to Microsoft Azure Basic and cloud deployment, and scalable resource management in real-world scenarios.

Hobbies

- Music, Drawing, Video Games, Football
